EBUS -UNBC Science Cohort Partnership

A unique partnership has been formed between School District 91's EBUS Academy and the University of Northern BC (UNBC). UNBC will play an enhanced role in educational and experimental opportunities in a new cohort-based program for full-time EBUS students.

A limited number of priority seats are available to EBUS students to introduce them to science-related fields and career opportunities through authentic learning experiences with the university in Prince George.

This extracurricular program will run through the 2021-22 school year. It will feature connections with science specialists and professors, university lecture observations, and trips to the campus for multi-day cohort events.

"The school district is again proud to join UNBC in this exciting partnership to create unique, authentic, and hands-on learning opportunities that fit perfectly into the overall district vision and Board of Education Strategic Plan," said SD91 Superintendent Manu Madhok.

EBUS Academy information:

EBUS Academy is one of the largest distributed learning (Online) schools in the province. We currently enroll over 1000 grade K – 12 and adult learners from around the province. We have a well-developed and proven formula for helping students achieve their academic goals. EBUS is celebrating 27 years of serving BC families and is the oldest distributed learning school in BC.
